

Release Notes – September Release

iOS App (version 2020.200929)

Note: Items which are noticeable to drivers and major new features for fleet managers have been highlighted in **Red**.

- **What's New**
 - DVIR screen
 - Graying out the selection Form if the vehicle/trailer has a default assigned DVIR form
 - United States Regulations
 - Changing the exception label & description for Short Haul HOS exemption
 - This will be based on the account property ***hos.use.fmcsa.regulation0520***
 - If the value is **false** or the account property is not existing, the labels will be default to:
 - for **ShortHaul12HourNoBreak**
 - 30 Minute Break Exemption for Short-haul Drivers (12 hour shift) - 395.1(e)(1)
 - for **ShortHaulNoLog**
 - No Logs for CDL short-haul Drivers operating within 100 air miles (12 hour shift) - 395.1(e)(1)
 - If the value is **true** then:
 - for **ShortHaul12HourNoBreak**
 - 30 Minute Break Exemption for Short-haul Drivers (14 hour shift) - 395.1(e)(1)
 - for **ShortHaulNoLog**
 - No Logs for CDL short-haul Drivers operating within 150 air miles (14 hour shift) - 395.1(e)(1)
 - Ability to add a non-driving event regardless of the vehicle's setting of 'Requires VBUS connection for driving' is enabled or disabled
 - **Fixes**
 - Fixes the issue where app crashes when tapping the Start Break button on the Change Status dialog [*Related Issues: #4014*]
 - Fixes the issue where Arriving at Terminal warning dialog keeps on displaying [*Related Issues: #3798*]
 - Fixes an issue where the sequence ID number of any edited events is being duplicated on the FMCSA ELD CSV Output File
 - Fixes an issue where the Pre-Trip DVIR Not Performed notification in app, email and SMS are not working when a driver has DVIR only product
